

The Edumocni Foundation was established in August 2018 to help develop future professions in Tarnów (Poland). We conduct activities for the development of digital competences of children and youth, raising the professional qualifications of employees and preventing unemployment.

The Edumocni Foundation is NGO located in Tarnów in southern Poland.

Thanks to the experience of our team, we apply for EU funds, help our clients obtain subsidies, and actively operate on the training market which is co-financed from the European Union.

Our activities are focused on:

- conducting educational projects for children and adolescents, mainly based on IT-related areas
- vocational training developing the skills and qualifications of adults who end with an exam confirming acquired qualifications or competences
- conducting vocational activation projects focused on vocational reorientation and changing or finding a new job
- supporting local enterprises and creating a startup-friendly environment
- vocational training for SME employees
- engaging in projects of a social nature, mainly from the education and labor market sectors
- activation and help in finding a job for people with disabilities

Our recent projects:

- Global Entrepreneurship Week - conducted for the second time in the EDUmocni Foundation
- numerous training courses in programming and IT
- assistance in preparing applications for starting a business
- MBON - a project for enterprises in Lesser Poland (training, consulting services)

Trainings are conducted by trainers, business practitioners with many years of professional experience and many hours of training.

We have the MSUES quality mark (Lesser Poland Standards for Education and Training Services).
